printing had the wrong color plates. Unfortunately, the book I received had color plates for the NE U.S.-- flowers from Massachusetts, etc. A nice error by the publisher. The text was as expected based on a version of this book I had seen. I guess I can always tear the plates out. Let the buyer beware. 8 of 9 people found the following review helpful. Sierra Club Naturalist's Guide First Rate. By ratchley@fresnochristian.com. Stephen Whitney has taken most of the University of California Press guides and books and done an excellent job of condensing a wide range of biotic and abiotic topics. I highly recommend this guide to anyone interested in the Sierra Nevada, whether a teacher, backpacker, student, or amateur naturalist.
