So I was disappointed but it was my own fault. The pictures are very pretty but I was looking for something with information about the different birds.

Fittingly known as the Natural State, more than half of Arkansas is forested. This small, rural state harbors a vast diversity of wildlife including 405 species of birds. Beautifully illustrated, this guide highlights over 140 familiar and unique species and features a back panel map of the state's eco-regions and most prominent birding hotspots. Laminated and pocket-sized, it is an ideal field reference for residents and tourists alike. Made in the USA.
