Trails are explained and rated very well.3 of 4 people found the following review helpful. Must have for off road adventures!By ClintThis is the most thorough resource for off road travel I have seen. I found some beautiful and fun roads near my home town that I was completely unaware of. This book is perfect for those who have stock vehicles and want to enjoy the backroads. You will know in advance whether your vehicle can handle the route without getting damaged or stuck. (Yes, there are also some more difficult roads in the book for those who are equipped and need a challenge.)The maps are easy to use and sufficiently detailed to find your way in the most confusing dirt road mazes of the Sierras. In addition to the specific descriptions for each road, the historical, geological and other information is great. If your passenger gets bored, just give them this book and there is plenty to read.0 of 0 people found the

Part of a multi-award winning series, Backcountry Adventures: Northern California provides information and directions to 2,653 miles of SUV trails throughout the glorious California backcountry while teaching minimal environmental impact travel. The book gives detailed, step-by-step route directions for 152 scenic drives, rated from easy to challenging that take you from the coastal redwood forests to the peaks of the Sierra Nevada. In addition to the enormously detailed trail information, there are hundreds of photos of frontier towns, historic mining operations, old railroad routes, wildflowers, and native animals. Trail history is brought to life through the accounts of Spanish missionaries who first settled the coastal regions of Northern California; eager prospectors looking to cash in during California's gold rush; and legends of lost mines still hidden in the state's expansive backcountry. Every trail includes maps, ratings for degree of difficulty and scenic beauty, driving times, distances, and GPS coordinates. The book appeals to virtually everyone who loves the outdoors: campers, anglers, hikers, mountain bikers, snowmobilers, amateur prospectors, sightseers, GPS owners, wildlife seekers, and more.
