Chuck Haney, Dick Kettlewell : Badlands Impressions before purchasing it in order to gauge whether or not it would be worth my time, and all praised Badlands Impressions:

0 of 0 people found the following review helpful. Love the badlands of North Dakota and many of the ...By Joyce Bement Love the badlands of North Dakota and many of the photos are taken there in the Theodore Roosevelt National Park and surrounding areas. 0 of 0 people found the following review helpful. Beautiful Work By Mr. And Mrs. S Chuck Haney has done an outstanding job of capturing some of God's majestic landscape. The badlands are like no other place on earth. You'll be blown away by the beauty. Dick Kettlewell does not disappoint with the information he provides for each picture. Together the two make a perfect team which makes for an amazing piece of artwork. You'll learn a lot as you flip through the pages looking at pictures. You'll discover cottontail rabbits and learn what they like to eat as well as how often they breed. You'll see well known landscapes such as the Chimney Rock which is a "prominent geological rock formation in Morrill County of western Nebraska, or the Nebraska Panhandle, as locals know it." Here's some more interesting information on Chimney Rock, "During the mid-19th century the Rock served as a landmark for westward bound settlers along the Oregon Trail, the California Trail, and the Mormon Trail." (both quotes taken from page 31 of Badlands Impressions). The book is an amazing tool to not only learn about wildlife but also history ranging from Kansas to the Dakotas. Nature lovers will be glad that the pages are glossy. As all nature lovers know, glossy pages make it so as you don't have to worry about the occasional drool splatter as you dream of seeing such beauty in person. I'm not disappointed in the book and look forward to many more afternoons of prowling through it.

To photographer Chuck Haney, the badlands of North America's high plains are a photographer's paradise and spiritual

places that touch the soul. In these striking, arid landscapes, the only constant is change and erosion is king. Here, water and wind are nature's artists and historians, sculpting haunting landforms of sandstone and clay, and recounting the land's prehistory in layers of ancient sediments studded with fossils and bones. Packed with 83 striking color photographs, *Badlands Impressions* truly captures the rugged terrain of these harsh and beautiful landscapes. In a journey spanning multiple states, including Kansas, Montana, Nebraska and North and South Dakota, *Badlands Impressions* will transport readers to the very best scenery our Badlands have to offer. Highlights include visits to Badlands National Park, Makoshika State Park in Montana, Little Missouri National Grasslands, Theodore Roosevelt National Park - and that's just the start!

About the Author Chuck Haney is a professional freelance photographer and writer based in beautiful Whitefish, Montana. He travels extensively across the United States and Canada in pursuit of the finest and most intriguing images. His provocative use of natural light in landscape, wildlife, and outdoor sports images have drawn national acclaim and have landed him many assignments including advertising campaigns. Chuck's finest images grace the walls of many residential and public spaces. His travel and outdoor lifestyle articles have been featured in numerous national and regional publications; adding to the thirteen coffee-table books, over 190 magazine covers, and numerous sole-photographer calendars to his credit. Chuck enjoys teaching a series of popular photography workshops across the country each year. Dick Kettlewell's professional roots are in journalism, having worked for mid and metro-sized daily newspapers for twenty-eight years. During the mid-1990s, he moved to South Dakota's Black Hills in pursuit of a career in outdoor journalism.
