The author gathered a great amount of information on all of them. If you want to see all of them though you better figure at least a summer. There are 164 of them listed. I like to photograph lighthouses so often use Google Earth to see the layout of the lighthouses, but with the book you can get a lot of information that helps with when to photograph them.3 of 3 people found the following review helpful. Used Lighthouses and Lights of Nova ScotiaBy Beverly SwearingenThough my soft cover book was supposed to have been a used library book, you

could have fooled me. Looks brand new! and contains lovely photos and information. The book arrived several days before we left for a wedding in Nova Scotia, so it was very helpful. Our day at Peggy's Cove Lighthouse was picture perfect!!!! Just wish we could have seen more!!!0 of 0 people found the following review helpful.
