It doesn't show all of London --it does have a nice tube map on it-- but that covers part of the city. We were able to place most of the places we wanted to visit but it wasn't quite what we wanted. We will have to get something better later on to help us with walking the city negotiating streets. Also appears to be somewhat off on distances compared to when we put in addresses on google maps their key of distances.7 of 7 people found the following review helpful. Exactly what I was looking for!By StockShowMomvery clear map of central London, big enough to provide significant detail, but not so large it becomes difficult. The major attractions are already marked and I'm marking everything else I want to see. This will make it much more time-efficient to route my day and not accidentally bypass anything and have to back track!4 of 4 people found the following review helpful. Good map for most London visitorsBy Maargaret PlunkettI was very pleased with this map of London. it was easy to carry, easy to open and easy to read. But I was disappointed in it because the flat where I was staying was on the South Bank and the map didn't show the area I was in at all. Yet on the north side of the Thames, the map ranged well out of London into the suburbs.
