**Lonely Planet, Bridget Gleeson : Lonely Planet Discover Las Vegas (Travel Guide)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Lonely Planet Discover Las Vegas (Travel Guide):

0 of 0 people found the following review helpful. Not made for Kindle viewing By DonDon This review is for the digital version. While the content is ok, the indexing and navigation on the Kindle app (iPad) is simply bad. I found myself constantly tapping around, trying to follow my steps, for simple things like looking up a recommended restaurant. There even isn't a real table of content in the beginning. Very mainstreamish information, maybe LV is not

really fitting the former Lonely Planet paradigm of tourism... I had the feeling that 2/3 of this edition could easily be found online elsewhere. Quoted prices are for the most part already history. Maybe better stick with the print edition. 0 of 0 people found the following review helpful. Las Vegas By alikatnzI bought the kindle version after buying the hard copy earlier in the year. Reason being that while I'm taking my iPad with me to Vegas, I'm saving weight by leaving the physical book at home. This Discover guide is updated and easier to navigate than the previous edition (which I also own) and has made planning for our next trip so much easier as well. The Kindle version is FANTASTIC for the offline maps too. 0 of 0 people found the following review helpful. Not for me but OK for others By Speaker for Myself Not really for someone on foot. I stayed at Fremont Street and this was of no help. If you had a car the book might be worth something but not to me. Google is better, vegas.com is better, the hotel staff gave better suggestions on things to see. This book will be perfect for some, just not for me.

About the Author Though born and raised in the US, Bridget hasn't lived in her native country in years. She studied in Rome, taught English in Prague, worked with children in an impoverished community in Nicaragua, and listened to countless stories of her mother's solo adventures through South America in the '70s, before arriving in Argentina at the start of 2007. These days, Bajofondo is on heavy rotation in her apartment in Montserrat and she can (usually) understand porteno (BA local) hyperbole and hand gestures. While trying to detect notes of plum and oak in a glass of Malbec, she's worked as a journalist, editor and sometime photographer for Time Out, National Geographic Personal Explorer, Sherman's Travel and Tablet Hotels. Bridget also photographed many of the images in this book.
