**Lonely Planet, Charles Rawlings-Way, Brett Atkinson, Sarah Bennett, Peter Dragicevich, Lee Slater : Lonely Planet New Zealand (Travel Guide)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Lonely Planet New Zealand (Travel Guide):

This guide looks like a combination of the North Island and the South Island Guides. The section on the South Island looks almost identical to the guide that I have that

is Five years old. I was hoping for some updated descriptions or new entries or expanded areas - instead, it is the same old thing. 10 of 10 people found the following review helpful. It's also good to know what not to do and stay away ...By Paul E Areus I'm a big fan of lonely planet guidebooks but this one wasn't nearly as comprehensive and insightful as a lot of the other places they review. It's also good to know what not to do and stay away from like completely waste of time tourist traps. I ended up going to some places that other LP guidebooks would very kindly steer me away from (like Lake Tekapo which isn't actually a lake but a reservoir and doesn't actually have any real hot springs just a big swimming pool with heated lake water, plus the mountain views are infinitely better only about 30 minutes up the road) 6 of 6 people found the following review helpful. Good guide but not outstanding By C. Potter This guide seems to be pretty good in that it is much like nearly all others. There is information about a large number of things, but it is still hard to make decisions about what to see. There just isn't enough information about any of the items to create a clear understanding of what you might want to see or skip
