Danny Palmerlee, Beth Kohn : Lonely Planet Yosemite, Sequoia Kings Canyon National Parks before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lonely Planet Yosemite, Sequoia Kings Canyon National Parks:

4 of 4 people found the following review helpful. Thumbs down for Sequoia and Kings Canyon By Customer I bought this book for a trip to Sequoia and Kings Canyon and was rather disappointed at the paltry coverage given. Honestly,

after having done a 8-day trip in these parks, it felt as if the author(s) of these sections did not personally visit the parks, or even if he/she/they did, they probably just breezed through and/or got information from the Rangers stations instead of actually experiencing the parks for themselves. Descriptions are brief to the point of inadequacy for many of the sights. Take Hume Lake, for example. If we had just based our decision whether to visit or not on the guidebook, we would have skipped it, because it's two-sentence description stating the obvious: a) it's a lake; b) they have a campground, a shop, phones yadda yadda. We were glad we made the stop anyway, and it turned out to be one of the most enjoyable parts of our trip. There's a lovely little area called 'Sandy Cove' which the book makes absolutely no mention about, and neither did it point out, that despite rambling off a bunch of amenities, there are no showers at Hume Lake. I find it disconcerting that the major sites in the parks get a one or two line mention, but the lodges and restaurants in the park get long detailed descriptions. This is a beautiful National Park in the Sierra Nevadas, a showcase of nature's wonders. Surely the focus should NOT be on how awesome a lodge is or how great it is to find a pizza parlor in the National Park. Missing the point much? Overall, the guide was not a total dud, because the table listing the various campgrounds (Sequoia Kings Canyon) is useful as a quick reference summary, and the descriptions of places, albeit brief, at least provided an indication of what these sights were: something not available in the free map provided by the Parks. I can't speak for the section on Yosemite, but the Sequoia and Kings Canyon section is disgraceful if upheld to classic Lonely Planet standards (some of their recent stuff has been unbelievably inadequate, unfortunately). Would NOT recommend for Kings Canyon Sequoia. 0 of 0 people found the following review helpful. Ditch the car and enjoy the scenery By Customer After arriving in August at our motel in Exeter after midnight, we were glad this book had suggested we ditch the car and take the shuttle (\$15) for the 2 hour trip in and out of Sequoia park. As it suggested, this is a fine way to ditch the car and enjoy the scenery and the driver was very informative. Since the book explained that the subsequent free shuttles within the park could take us from one scenic hot spot to another, we were free to catch lunch in the park, go to the appropriate trailhead, leave the crowds, and take an almost private hike from the Giant Forest to Crescent Meadow where we picked up the shuttle and rejoined the crowds at Moro rock. Similar advice helped us navigate the beautiful Yosemite Valley (crowded but gorgeous Mist trail to the top, relatively uncrowded John Muir trail down). A friend had suggested a less crowded, but beautiful trip to Taft Point then to Sentinel Dome, followed by a short drive to crowded Glacier Point, all easy to find using this book. Saved time, stress, and any anxiety about finding the right trails for us. 1 of 1 people found the following review helpful. Maps and write-ups of trails don't synch By An Experienced Hiker The write-ups of trails are pretty good, but there wasn't a map of the trail right there with the description, nor was there any way to quickly link one trail to another. Another complaint about this book is that there wasn't a large map showing insets of the trails. I read about Tuolumne Meadows and of Glacier Point and decided that I wanted to visit them. There was a map of each (somewhere in there) but I couldn't tell how far they were from each other, nor tell what part of the park they were in. Turns out they are about four hours / a hundred miles' drive from each other. I used this book in conjunction with the Falcon's Guide to Hiking Yosemite National Park and found they complemented each other well. A E H

Yosemite's granite domes, sweeping vistas and graceful waterfalls amaze visitors, while giant trees tower over Sequoia Kings Canyon. Whether you want to sit among flowers in Tuolumne Meadows or scale the heights of Half Dome, gear up with this top-selling guide to these well-loved national parks.
