Problem is the book doesn't RATE the restaurants, nor does it indicate their specialty menu items or type of food like Zagat. It simply lists 500 restaurants in Los Angeles, their address and phone number. You can find the same information in a phone book, which is probably the source of information for this book. Greatly disappointing. The type face is so small that most of us would need a magnifying glass to read it. They tried to squeeze as many listings on a page as they could to use less paper (pages). It would never had bought this if I glanced through it in a store. I was going to return it, but the cost of postage would be almost the cost of the book. 0 of 0 people found the following review helpful. don't bother restaurant reviews By careful buyer neither were great or up to date, must have been some paid entries also from the inclusions 0 of 0 people found the following review helpful.
