Delorme : Louisiana Atlas Gazetteer before purchasing it in order to gauge whether or not it would be worth my time, and all praised Louisiana Atlas Gazetteer:

Really helps you to familiarize yourself with a new parish or area of the state before travelling there, or finding a way to get back onto a major hwy/interstate if lost. Not a great topographical map, but you could find a few bodies of water and some forests through here. For me it was useful to plan some in state road trips, hitting up some interesting towns and cities all along the way. Makes it really easy to go through the books and

find everything across the state by the way its laid out in a gridded fashion. Also the nicest atlas and map I've been able to find easily, so kudos for that even if it isn't perfect. 1 of 1 people found the following review helpful. Not a good revision
By canisltrans This seems to be a reprint rather than a revision. It is not bad. It does not have the egregious errors of the most recent Roads of Louisiana, Nor does it have the legibility problems of that atlas. But it is certainly not current, even as of its publication date. For example, there are numerous changes such as name changes of WMAs and new state parks, already listed in the free official state highway map of 2005 which were not incorporated in this edition of the atlas. That is inexcusable. I certainly hope that a new and truly revised and more or less up-to-date edition will be printed. I really like to use printed atlases. But if DeLorme and its competitors don't do a better job, they will be completely replaced by electronic systems, as out of date as slide rules. 0 of 0 people found the following review helpful. Good Investment for the Back Road Enthusiast
By EKWillie Great map! Tons of detail and it even covers the dirt hunting lease roads by my house. The only thing is i wish it was smaller for my motorcycle. But then I would be sacrificing the details in the map. I haven't had the chance to really dig in and use it a ton, but I've used it enough to say that it is a very good investment. The best thing that I do is make copies of a page and put it in front of me on the bike and take off. Great detail, and it doesn't miss a single road. The guide in the front for the campgrounds is extremely helpful and informative. The other feature I like is the powerlines map. This makes for some good off roading!
