He thought it was one of the best books about gems and minerals in Maine that he had ever read. He found it very informative and enlightening; also easy to read considering the subject matter could be quite dry. The size of the book was conveniently small enough so he could carry it around on his adventures. He absolutely loved it! Maine Mining Adventures 0 of 0 people found the following review helpful. reading thanks 1 of 1 people found the following review helpful. EnjoyableBy CustomerEnjoyable but mostly about personalities, not adventures. Need more about the gems, but the history is fun. Three more words for the review.

A mother lode of tourmaline on a mountain in Newry, a billion dollar discover of copper and zinc in Aroostook County, and mammoth pockets of amethyst in Stow are only a few of these Maine Mining Adventures. For the beginner, there are easy to follow instructions on how and where to find minerals and gold. Many locations are listed, and seasoned miners generously give advice and guidance.

Stevens captures the drama of some of the best of these finds with a polished and perceptive writing style. His interviews with the miners, gem cutters, artisans and collectors who make up the "gem scene" make you feel as if you're right at their workbench, kitchen table or looking over their shoulder as a blast is touched off. -- Douglas Watts, Maine Times, October 14, 1994Stevens captures the drama with a polished and perceptive writing style. The result is a window of the world of mining in Maine. -- Maine Times, November 1997From the PublisherC.J. Stevens, who introduced gold mining to so many with his book "The Next Bend in the River," and treasure hunting in "The Buried Treasures of Maine" presents a wide range of action with a background of the rivers, mountains and beaches of Maine. It is the world of minerals and metals. For the beginner and the veteran rockhound alike - the door to a great adventure.From the AuthorWe cannot know what is under our feet as we skip or limp our way to a river or quarry. Not knowing what we will find gives an edge to life. The privilege of being the first human to have seen a crystal or piece of gold is a reward far greater than the value of the find - it doesn't get better than this! There is something out there for all of us. Perhaps this book will open a path for you.
