I chair our local land trust's programs committee. That means I am the one who plans outdoor events - and often leads them. These guides are a laminated sheet that folds. They are light weight, sturdy, and can take the beating of rain, backpack, back pockets - and being handed around to a group of kids to use on a hike. They are not comprehensive by any means. But, when buying guides specific to your state, you will certainly find that the most common species will be represented - and arranged in helpful categories. And what are you most likely to see on a hike? The most common species! That is what is so helpful about these guides. They are not intended for the expert - or even the true enthusiast. They are great for family outings - and the casually curious. They make a great beginner's guide - and a packet of them would make a nice gift. They are very affordable. 0 of 0 people found the following review helpful. nature guide By mary anne lower pocket guide -- will be useful on fall trip to Acadia NP have used these before -- for a longer trip would need a bird book and maybe botany and animal book 0 of 0 people found the following review helpful. Good reference for walks in the woods By Tony MI never can remember names of plants, bushes, trees so this helps me to tell friends what they can look for when they return to same area.

The state tree, the eastern white pine, is one of thousands of species of plants growing in the diverse ecosystems found throughout the Pine Tree State. This beautifully illustrated guide highlights over 140 familiar and unique species of trees, shrubs and wildflowers and also includes an ecoregion map featuring prominent botanical sanctuaries. Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Made in the USA.
