Don Pattie, Chris Fisher, Tamara Hartson : Mammals of the Rocky Mountains (Lone Pine Field Guides) before purchasing it in order to gage whether or not it would be worth my time, and all praised Mammals of the Rocky Mountains (Lone Pine Field Guides):

0 of 0 people found the following review helpful. Five StarsBy lollimomThis series of field guide are very informative and interesting.0 of 0 people found the following review helpful. Five StarsBy Lisa B.Perfect field guide for kids!1 of

1 people found the following review helpful. Good book for Rocky Mountain mammals
By Willard Bowlin
I have really enjoyed this book. It is fun to see an animal in the wild that I have not seen before and find it in this book.

A colorfully illustrated field guide to 91 mammals common to the wide ranges of the Rocky Mountains. Full-page color photos, color illustrations, tracks and range maps are just some of the components of this guide.

...a must-have book...an ideal reference for any family where kids have to research critters for school projects...an easy-to-follow and beautifully illustrated guide... --Edmonton Sun
This field guide is a joy to use...written in a style that is informative, entertaining and easy to read. --Jasper Booster
About the Author
CHRIS FISHER is a university-educated naturalist with a background in research in endangered species management and wildlife interpretation. He has conducted birding expeditions extensively throughout the United States, Canada and Thailand and is the author or co-author of eleven books on birds. DON PATTIE is a biology professor at the Northern Alberta Institute of Technology. In recent years Dr. Pattie has been involved in developing a national training program for zoo personnel. He has co-authored a number of books on mammals in western Canada and the United States. TAMARA HARTSON, who also writes under the name TAMARA EDER, grew up with a fascination for nature and the diversity of life. Encouraged by her parents, Tamara was equipped from the age of six with a canoe, a dip net and a note pad. She has a degree in environmental conservation sciences and has photographed and written about the biodiversity in Bermuda, the Galapagos Islands, the Basin, China, Tibet, Vietnam, Thailand and Malaysia. When she is not traveling, Tamara enjoys writing and studying biodiversity. To date, she has authored or co-authored more than two dozen nature books.
