Cheryl Messinger, Terran McGinnis : Marineland (Images of America Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Marineland (Images of America Series):

0 of 0 people found the following review helpful. Great read, had no idea they had so many ...By Alyssa J. ScullyGreat read, had no idea they had so many different species in the past. Very interesting to read that their conservation work started so early. Many people think aquariums conservation work only started recently.0 of 0 people found the following review helpful. Fascinating Historical Review!By Frederick A. BramanCheryl and her co-writer Terran McGinnis capture an interesting place with a fascinating history. They tell the diverse story of Marineland, as most of us know it, with words and countless historical photos. They describe the changing character of a venue that continues

to serve an important role in the study of marine life and fill a prominent role in today's coastal community.0 of 0 people found the following review helpful. Great book for a wonderful little Florida treasure!By Lauren FThis book was wonderful if you grew up going to Marineland like I did. It has evolved so much over the years! It was a short, quick history of the world's first oceanarium. I would've LOVED to know more about the 80s and 90s, but that part was pretty much left out.

Marine Studios made history on June 23, 1938, when over 30,000 people crowded a quiet stretch of Florida coastline near St. Augustine to witness sea life, as it had never been seen before through 200 underwater portholes. Developed by three innovative entrepreneurs with ties to Hollywood, the newly coined term oceanarium described their novel concept as a place where marine life existed together. As the world's first oceanarium, Marine Studios sparked the country's imagination, displaying rare and unusual creatures in daily performances that included brave divers hand feeding sharks and handsome sailors presenting friendly dolphins in amazing aerial feats. Behind the scenes, Marine Studios perfected scientific innovations, breeding and raising the first dolphin calf, discovering dolphin echolocation, and featuring Flippy, the first trained dolphin in the world's first dolphin show!

About the AuthorExplore the birth of the world's first oceanarium with Cheryl Messinger and Terran McGinnis, whose lives are dedicated to the care and conservation of marine mammals. With a passion for preserving the historic significance of Marine Studios, they bring together this collection of images from its vast archives, uncovering the lasting relevance of the vision set forth by Marine Studios founders more than 70 years ago.
