A great reference for any northland nature lover...By Laura HaggartyThis excellent field guide is invaluable for those of us who live in the northern part of the Midwest. It covers the many types of habitats we enjoy here, and the plants, animals and birds found in them. The book is full of vivid pen and ink drawings showing samples of the variety of wildlife which abound here. It is extensive enough to provide thorough information, yet small enough to tuck into a backpack on a camping trip. It's a wonderful value and a fascinating read. Go for it!
