By TFLReader I am definitely not a nudist but recently found out that I have several friends that are. This came as a bit of a surprise to me and I set out looking for a few books to understand nudism a bit better. I ran across Nudist Cruise and thought that I would be sufficiently

entertained and educated at the same time with this book. I was right! The true story of Hailey McPherson's experience on a cruise ship with 2,000 nudists, the book tells of her various misconceptions and revelations with respect to nudism and the way that we view the human body. I laughed a lot and was enlightened along the way. Great read.

Hailey gets the chance to go on a free cruise, only it turns out to be a nude cruise. She goes anyway and discovers a little about the world of nudists and a lot about herself. This book is more about personal discovery than naked people. The narrative isn't entirely chronological. There are a few flashbacks here and there, but it's pretty easy to keep track of what's going on. The author's style is casual and reads well without looking like it was written by an amateur. Too many of these Kindle books look like they're high school essays. "Nudist Cruise" looks like a real novel. My only complaint is there's a tiny bit of Chinese in the book. Not everybody can read Chinese. I don't think the reader's supposed to understand what it means. It's always in a situation where someone's confused and doesn't know what's going on. I guess it makes sense to do it that way. If you can read Chinese, it's pretty funny. The old guy with the apple cake was hilarious. I loved how each chapter title can be clicked back to the table of contents. You can easily click back and forth from TOC to chapter and chapter to TOC. Why doesn't every book do this? The free preview is in bold, but I think that's just a glitch. What I downloaded looks great and is properly formatted. You don't have to be a nudist to like "Nudist Cruise". At the same time, it's not at all insulting or demeaning to nudists. Recommended for everyone.

By Heather G When Hailey McPherson was living in Hong Kong, far away from her Boyfriend, Liam, who was working on Mainland China, an opportunity came up for the two of them to take a cruise. As a couple who rarely saw each other, they jumped at the chance. Liam would be filling in for a friend who was an entertainer on the ship that friend has recently lost his father and would not be able to fulfill his cruise ship duties for a short while. The fact that Liam could make this the perfect arrangement, a short term gig that would enable the couple to have quality time and gain Liam some cash. What Hailey didn't know was that the cruise in question was a nudist cruise. Born and raised in Minnesota, getting naked in front of stranger LOTS of strangers was not exactly an appealing prospect. The idea of having those same strangers naked around her was even less so. Yet she boards the ship, and her experiences, both good and bad, are regaled in Nudist Cruise for our enjoyment. Told in an inviting way, like a friend imparting a secret, this book reads like a well-crafted story, engaging and even funny. There are plenty of embarrassing moments, and a surprising amount of growth. Don't be surprised if you want to book a Nudist Cruise when you finish the last page.

2,000 nudists and one textile young woman on a 13 deck, 75,000 ton cruise ship sailing from Shanghai to Bangkok, with stops in China and Vietnam. On the itinerary are such activities as swimming, miniature golf, karaoke, checkers. See a Las Vegas-style musical stage show, eat in several award-winning international restaurants, pamper yourself in the luxury spa, exercise in the state of the art fitness center all completely naked. What happens when a shy young woman who was always taught to be ashamed of her body finds herself on a cruise ship full of nudists enjoying the sun and water and letting it all hang out? An excerpt: The people on that cruise have the ability to see nudity in a naturally innocent way, the way most children do before we are all told that nude is lewd. As a dancer, I can relate to that. I think we are all natural born dancers, but at some point in our childhood we are told to grow up and stop moving with natural joy. Most people forget how to dance and even professional dancers have to be trained all over again. We talked and laughed, swam and played games, all completely naked. None of them noticed all the flaws I see in my body and no one laughed at anybody for being imperfect. When everybody is naked, no one cares about perfection. I was on a ship with 2,000 nudists. All of them were beautiful.
