Nace L. Hagemann : Old Minnesota before purchasing it in order to gage whether or not it would be worth my time, and all praised Old Minnesota:

Nace has done a great job of exploring the state and I highly recommend all of his books be added to your shelf of Minnesota literature. He has steadily developed his photography into an art form to be enjoyed by all! Each of his books are a pleasure to read, written from the point of view of a someone who became a resident by choice and obviously loves his life there.

Over 130 photos from northern Minnesota. An artistic record of Minnesota's aging buildings and landscape. Things that have been left behind that don't often catch the eye.

From the AuthorThenortheastern cornerof Minnesota has drawn me to it's boreal forests and clear lakes for years now. As I spend time in different parts of the state other things started to grab my attention.This bookis about me noticing our discarded past. Buildings falling down, cars left to rust made me think about who enjoyed these things when they were new ... they all were important to someone at some time. And then made me think even more about our own lives, that we are all aging too. That we are "rusting." This was aproject to hopefully push me to stay motivated and realize that every day I live is another day I don't get back. Hoping that I am living the way I really want to.We only

get so much time and I hope I don't end up looking back on my life and wishing I would have done something different, taken more chances, laughed more !,etc..From the Back CoverA unique way of looking at northern Minnesota. Over 130 photos that may change the way you see the landscape.
