In the era of web sites like Mapquest that allow instant directions to any location as well as GPS devices that are installed in many cars, a printed map book almost seems like an obsolete product. But not everyone has a GPS device in their car and it isn't always convenient or even possible to print directions in advance. For that matter, those web sites spit out incorrect directions from time to time, and can leave you driving aimlessly in an attempt to figure out what went wrong. The point is that for various reasons, you will sometimes find it quite helpful to have an accurate and detailed resource in the car with you for easy reference. For a small price, the Thomas Guide offers detailed maps for all of Orange County and by detailed, I mean every little side street is included. The Thomas Guide is updated every year so it is never too far behind the latest construction. This book is a great resource at a bargain price. It's easy to recommend to anyone. Keep it in your car, you never know when you might need it.
