Five Stars By Blaine Vachon Awesome! 1 of 1 people found the following review helpful. Fine Photos Tell The How-To's; Up to the Moment Gear and Technical Information By James Ellsworth This book begins with a fine essay with photos about the contemporary life of First Nations people living in the North Woods around the globe. The chapter makes the point that 'survival' tests for us are daily life skills by which these people live and thrive. Ray Mears and Lars Fält offer up-to-date information on both summer and winter camping skills and a good selection of associated tools and products. Even some basic food products and recipes are included. Generally fine step-by-step how to do it color photographs lift this work above earlier and very fine camping/wilderness guides from the past. I have owned, read and applied parts of those fine guides from the likes of 'Nessmuk' and Horace Kephardt up through the 1970's and 1980's authors who have earned their own ardent followers. The color photos here are the best I have seen on knot tying. I never did take to even the best-illustrated drawings because it was difficult to tell one rope from another and which loop went over and which bight went under. These clear photos, yes even using red and blue rope, are the best I have seen. The section on the finer points of straight knife and crooked knife and of belt axe use are superlative examples of technique as transmitted in words and photos. I have never seen better step-by-step instruction on cutting, techniques for blade control, which muscles to use for what cuts...this is OUTSTANDING information for beginners and for those of us who probably have 'never got it right.' Mears and Fält love the 'Boreal Forest' but, aside from extreme winter outdoor living, about 80 percent of the content here is highly usable for any outdoorsman. Suggestions for matching clothing and clothing materials to

summer and winter climates are generally applicable. First aid and emergency medical advice in the wild is 'decent' if not encyclopedic. Navigation by map and compass are clearly covered since the authors have military and training experience...plus modern ideas of GPS systems and products are addressed. Knife and axe and saw suggestions skew toward fine Finnish, Norwegian, Canadian and Swedish makers...but they are among the best choices for any of us 'Outers' who want to go into the woods today. Sufficient attention is also given to the mechanical needs/maintenance needs of snowmobiles in the wild since they are being increasingly used for winter access to outdoor living in the Far North. Canoe travelers in Minnesota's Boundary Waters, back country skiers and snowmobilers, mobile big game hunters in the North will benefit hugely from this up-to-date treatment of a 'pioneering' subject.

"Fifty years into my life journey I realise that; while I love remote wild places and the peoples I meet there, it is in forests that I find the greatest joy. Of all the forests that I have explored, it is the great circumpolar Boreal forest of the North that calls to me most. Here is a landscape where bush knowledge really counts and where experience counts even more. . . This book has been thirty years in the making." "Out on the Land is an absorbing exploration of, and tribute to, the Boreal forest of the North: its landscape, its people, their cultures and skills, the wilderness that embodies it, and its immense beauty. The book is vast in scope and covers every aspect of being in the wilderness in both winter and summer (clothing, kit, skills, cooking, survival), revealing the age-old traditions and techniques, and how to carry them out yourself. It also includes case studies of early explorers, as well as modern-day adventurers who found themselves stranded in the forest and forced to work out a way to survive. So much more than a bushcraft manual, this book goes deeper, to the traditions and cultures that gave us these skills, as well as focusing on the detail itself. Ray and Lars's practical advice is wound around a deep love for the forest, respect and admiration for the people who live there and sheer enjoyment of the stunning scenery.

"Substantial in size and content and clearly designed to both inform and inspire . . . if you can hold back from buying this book for yourself straight away, then it's definitely one for the Christmas list." - Bushcraft Magazine "A must-read for those venturing into the Far North." - Milbry C. Polk, Explorer's Journal "A superb 335-page book, with great photos, and absolutely packed with facts and practical bushcraft advice." - Countryside Magazine "Bushcraft tales and tips in a beautifully photographed book." - BBC Countryfile "Stunning photographs." - Mail on Sunday "Easy to read, comprehensive in its information, and packed full of brilliant photography." - Adventure Travel magazine "A great read." - Camping Caravanning

About the Author Ray Mears is recognized worldwide as an authority on bushcraft and survival. He has also become a household name through his TV series including Tracks, World of Survival, and The Real Heroes of Telemark. Lars Flt is the founder of the Swedish Army Survival School, lectures on survival worldwide, and has written 10 books on wilderness living skills. Ray and Lars have worked together for more than twenty years teaching survival in Arctic Lapland some 200km north of the Arctic Circle.
