**Hank Fischer : Paddling Montana (Regional Paddling Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Paddling Montana (Regional Paddling Series):

BrackettThis guide accomplishes exactly what it sets out to do in a thorough and stylish layout. The reader can flip through the pages until they see the river in question at the bottom right and have immediate access to nearly all put-ins and take-outs along the prospective float. Included with every river is a great summation of popular routes for

fishing and white-water, and info on major hazards that the floater should be aware of. Even a nice summary of each route's notable fishing or whitewater features. If you're a boater, floater, or just a curious hobbist, this book is an essential starting point for any Montana river exploration. I found that the points other reviewers took issue with were inconsequential to the scope of what the authors attempted to accomplish with this book. As a starting point for the clue-less, there really is no better publication available for us Montanians. If you want advanced or indepth information about the potential float, such as new seasonal hazards (strainers, landslides), the fishing report, or legal information, contact the local authorities on the river - listed conveniently at the beginning of each chapter. This book deserves prominence on any Montanian's collection of hikes, floats, and maps section of the book case. The authors did a great job!

A complete dud. Long on trivia, short on necessary information. Places are mentioned in the text, but not shown on the map. Example - The Yellowstone chapter mentions Yankee Jim Canyon, but it's not on the map. The history of Yankee Jim George, after whom the canyon was named is interesting, but it shouldn't have been included at the expense of information on where the canyon is. This is but one of many examples. I've paddled in several states, and own several paddle guides. This one is by far the worst. Save your money.

Detailed paddling information on 32 Montana rivers, including such paddling destinations as the Yellowstone, Flathead, Smith, and Missouri. Access points, detailed maps, fishing information, average monthly stream flows, and much more.
