**Lynne and Robert Diebel : Paddling Southern Minnesota (Trails Books Guide)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Paddling Southern Minnesota (Trails Books Guide):

Not only does it provide great maps with mile markers, in/out points, and show locations of camp grounds, it also describes the scenery, gives Internet addresses to look up water levels for each river, and grades each trip for beginner, intermediate, and advanced paddlers. The maps will scan or photocopy easily to insert in a zip-lock for your trip. The reason for four stars is that it lacks two things I would like to see in the book. First, there is no reference map of Minnesota to show where the rivers are--you have to get out your atlas to locate it. Second, each trip is designed as a day trip, which is great if you just want to go for a Saturday. However, it would have been nice to have an indication of which rivers make good weekend camping trips,

providing the start and end points and camping locations for such a trip. If the authors write a new ed. in the future, I hope they will incorporate those ideas into the book. 0 of 0 people found the following review helpful. Great book!
