Rainforest Publications : Panama Marine Mammals Identification Guide (Laminated Single Sheet Field Guide) (English and Spanish Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Panama Marine Mammals Identification Guide (Laminated Single Sheet Field Guide) (English and Spanish

Edition):

Panama is visited by a variety of Whales and Dolphins, and by the West Indian Manatee. This handy reference guide will help you match the shape of the dorsal fin you see with the whales. You get full color, highly detailed, scientific accurate illustrations on a one sheet (double-sided) waterproof, UV resistant, durable guide that is exactly the right size (7"x11" (17.85cm x 28cm)) to fit in your pack or tote. The illustrator, Uko Gorter, is a well regarded scientific and natural history illustrator who specializes in marine mammal illustration. Each illustration includes the name of the marine mammal in Spanish, English, and Latin along with a couple additional notations such as size and territory. This guide includes whales seen on just the Pacific coast, just the Atlantic coast, and on both. Rainforest Publications' wildlife guides are the perfect companion if you're a naturalist, critter watcher, or adventure traveler.

About the Author Rainforest Publications specializes in the Wildlife and Natural History of Central and South America. Our wildlife guides are the perfect companion if you're a naturalist, bird watcher or adventure traveler. Our illustrators are tops in their field of interests and spend a lot of time in the wild and studying the species they illustrate. Most live in Costa Rica. Our scientific staff continually updates the guides so the information is complete and accurate. Our print company is locally owned by its employees. Our guides are printed in the USA on recycled paper.
