By FWCWe used this book to locate cancellation stamps in Acadia national park. The book tells you where the stamps are located, which is helpful when about half of the stamps were stored behind a counter out of sight. In addition by collecting all of the stamps available we discovered new parts of the park we would not have experienced otherwise.

By meThis is an excellent, detailed guide of the areas in and surrounding the North Atlantic Region area. Although this book is not the actual 'Passport' in which to receive park cancellations, the book is very informative and a great item from which to learn about the area.

PASSPORT TO YOUR NATIONAL PARKS COMPANION GUIDES
Randi S. Minetor
The first comprehensive companion guides for 1.7 million Passport owners
This all-new travel guide series is the only one to devote itself to our National Parks and, more specifically, to the secret places and tips on obtaining the Passport to Your National Parks cancellation stamps. This is a nationwide treasure hunt, in the spirit of the wildly popular geocaching and its older cousin, letterboxing. The National Parks bookstores sell more than 100,000 Passports each year, and travelers then seek out the roughly 1,500 cancellation stamps found in more than 150 national parks. These three regional guides not only contain park maps, suggested tours, and details about each park, they also list business hours and specific stamping locations, and offer tips on how to fully enjoy the park as well as the collecting game. Passport holders are always searching for the cancellation sites, and this is the first time a travel guide reveals exactly where and how to find them. Each regional book is a must-have because these passionate National Parks visitors will want to collect them all.
